

MAINSAIL STANDARD BATTEN

TRI-RADIAL

Dolphin tri-radial conventionally battened Mainsails offer the lowest stretch and ultimate shape holding capability for the cruising sailor seeking the highest performance.

The complex panel construction is finely tuned to match the catenary loads in the sail.

A range of fabrics are available from single sided taffeta laminates in Mylar or Pentex to double sided taffetas in Spectra or Vectran.

CROSS CUT

Dolphin mainsails utilise the highest specification Dacron fabric. This provides high strength, low stretch, durability and longevity, the prerequisites for any cruising sail.

Whilst cross cut, the panels are orientated in a 'rocked' arrangement that aligns the stronger fill orientated fibres carefully with the catenary loads in the sail.

STANDARD FEATURES

- Highly refined designs, hundreds of sails built.
- Superior pre-glued three step seam construction.
- Pre-glued step down patch construction.
- Offset or Velcro closure pockets.
- Sail slides.
- Durable fibreglass battens.
- Low stretch leechline with aluminium cleats at each reef.
- Luff reefs with pressed rings and spectacles-where applicable.
- Loose-footed main for shape control-where appropriate.
- Insignia and sail numbers.
- Tell tales.
- Drawstring sailbag.

EXTRA FEATURES

- Reefs.
- Flow stripes.
- Seamkote.
