Sprayhoods

Dolphin Covers know that to create the best fitting sprayhoods you must get tension in the whole cover to make the hood become a rigid structure.

Our Sprayhoods are designed with this in mind. The rigidity is produced by cloth orientation of panels and additional reinforcement where needed. Both of these combined with years of staff experience in patterning, the latest CAD technology along with high quality manufacturing standards all come together to produce the best fitting product on the market.

Upgrades & Extras

Mesh side pockets in the sprayhood wings.

A zip-up front is available as an upgrade.

This popular upgrade of side hand rails makes it safer when leaving the cockpit - they are available as a fixed or folding option

A welded grab rail. This can be with or without leather.

Enclosures

Cockpit enclosures are a great way to add additional covered space to your boat. They could be thought of as adding an extra room. After listening to your requirements we will design the Dolphin Enclosure to best suit your needs. We offer two styles, the first having fixed sides with windows and zip up door panels. The second has separate removable sides, which doubles up as a bimini when all the sides are removed.

With the UK weather being so unpredictable the enclosure with the removeable sides is the most popular choice with our customers.

Here is the same enclosure with the sides down and then removed to act as a bimini:

Fixed sided enclosures:

Biminis

Each Dolphin bimini is designed to suit your needs and requirements, with fixed or tilting frames. Our biminis can be designed with zipped removable solid or mesh side panels, which produces a cover to keep the cockpit area completely in the shade. In addition we can add boom light or mainsail trim windows into the bimini to suit your requirements.

Key Features of range

WeatherMax 80

WeatherMAX™

WeatherMax is a fabric that combines breakthrough UV technology with water resistance and durability. WeatherMax is the perfect balance of science, resilience and style.

The new WeatherMax fabric has taken away the need to make a choice between a waterproof and a breathable fabric by offering a solution to both. The WeatherMax has a HydroMax finish which ensures there is no need for extra coatings. This makes the WeatherMax lightweight, water resistant, non-sagging and durable. The HydroMax finish also provides excellent breathability to help reduce condensation and mildew.

- Twin ply WeatherMax wing panels
- Radial patching and stitching to absorb the loads when under tension
- Polyester webbing used throughout
- Double stitched and turned window edges
- All seams double stitched
- WeatherMax bias binding on all outside edging
- Extra care and attention to every last detail in the cover finishing

The difference is in the finish!

Window Upgrade

PVC window material is used as standard but we can upgrade the window to *Strataglass* for unrivalled clarity. This is not an option when the sprayhood is to be folded down.

STRATAGLASS
STRATAGLASS
The Clear Choice

Tenara Thread

- UV and weather-resistant
- Unaffected by sunlight UV radiation
- Unaffected by weather including water or saltwater
- Will not rot or decay
