

dolphin COVERS

Yacht Overall Covers

Custom Designs

To help protect your boat from UV and the rigours of the winter months, let Dolphin design and make an overall cover that will protect it from the elements. Depending on your boat size and location we will either pattern the cover in the conventional way or use the latest in Pro-liner 3D CAD measurement to plot the exact dimensions of your boat and design the cover to suit. There are various different overall cover designs that we can offer to suit your requirements.

- Over deck/cockpit covers
- Toe rail winter covers
- Overall winter covers

Dolphin over deck/cockpit design

Dolphin toe rail winter covers

Dolphin complete overall winter covers, these can be designed to fit with the boat either in or out of the water.

Fabric - WeatherMax 80

WeatherMAX™

WeatherMax is a fabric that combines breakthrough UV technology with water resistance and durability. WeatherMax is the perfect balance of science, resilience and style.

The new WeatherMax fabric has taken away the need to make a choice between a waterproof and a breathable fabric by offering a solution to both. The WeatherMax has a HydroMax finish which ensures there is no need for extra coatings. This makes the WeatherMax lightweight, water resistant, non-sagging and durable. The HydroMax finish also provides excellent breathability to help reduce condensation and mildew.

Tenara Thread Upgrade

- UV and weather-resistant
- Unaffected by sunlight UV (ultraviolet) radiation
- Unaffected by weather including water or saltwater
- Will not rot or decay
